

Product Name: Flying Tiger 7.5M Racing Boat

Product Directions:

The Flying Tiger 7.5 meter is the latest in the line of sailing sport boats built by Hansheng Boatbuilding Co. of Xiamen, China. Designed by Robert Perry and marketed world-wide by Flying Tiger Boats, the FT 7.5 provides a fast, fun, and affordable platform that is suitable for beginning sailors, families, and racers. With a cockpit over 4 meters in length the FT 7.5 can carry a large crew with room to spare. Below decks there is a V-berth forward and two settee berths for those rare overnights. The 7.5 is built with a raising keel that makes the boat easy to store on land or trailer. Carbon fiber mast, boom, and prodler along with Aramid sails and an asymmetrical spinnaker are included with the boat and will please those looking for high performance at an affordable price.

Designer: Robert H. Perry N.A.
